Summary

Product manager who builds. Starts with users and messy data, turns ambiguous problems into scoped, prioritized work, and uses **Claude and Cursor** to ship working prototypes in days instead of waiting on a spec cycle. Comfortable across discovery, SQL analysis and delivery with engineers, with work spanning **fintech, health-tech, recruitment and B2B SaaS**. New grad, ready to own outcomes from day one.

Projects

Founder Desk: India-US Compliance Desk | *Next.js, TypeScript, Gemini, Vercel* | [Live App](#) | [GitHub](#) Oct 2026

- Built and shipped solo with Cursor and Claude: a personalised 12-month deadline calendar across Delaware, IRS, MCA and RBI rules (US rules **verified against official sources**), a Delaware franchise tax checker using exact arithmetic, and an **LLM inbox** that turns pasted notices into dated deadlines.
- Designed for trust: every AI field shows a source quote and needs human review, deadlines use statutory dates with per-rule weekend rules, and a free-tier LLM is kept reliable with retries, a fallback model and quota caps; **112 automated tests**.

Second Take: Hard-Conversation Practice App | *React, TypeScript, Cursor, Vercel* | [Live Demo](#) | [GitHub](#) Oct 2026

- Built and shipped solo in a **few days**: 3 scenes where each partner has a hidden want, triggers and a -3 to +3 mood model, with every reply scored against a skill rubric and given line-by-line feedback.
- Kept scenes as JSON, separate from code, with a **build-time validator** that fails the build on structural writing errors; merged branches each turn so each line needs 3 versions, not an exponential tree.

Vibeshelf: Cross-Media Recommendation Engine | *Llama 3.3-70B, Groq, Netlify* | [Live Demo](#) | [Case Study](#) Jun 2026

- In a 2-person hackathon team, owned framing, scope and UX: reframed recommendations from ranking to input vocabulary, shipping a **live 547-title LLM tag-matching MVP** for books, films and games in **48 hours**.

Experience

WhatBytes

Remote

Product Management Intern

Mar 2026 – May 2026

- Stepped into a stalled build for a NYC-based recruitment platform, worked hands-on with 3 developers to clear 5 critical blockers, and shipped the prototype **1 week ahead of schedule**.
- Owned launch readiness for a crypto-fintech app: tested the full sign-up funnel, chased down and closed **10 launch-blocking bugs**, and drove a rebuild of the onboarding flow.
- Ran the Play Store and App Store release for a Latin American fintech app, and shipped 40 artwork pages across 2 galleries for a museum app.

Pulsepeek

Remote

Product Management Intern

Jan 2026 – Feb 2026

- Ran **20 user interviews** on a health-tech MVP, found confusion was the core barrier, and fixed it with an in-app guide.
- Worked directly with founders and developers to turn the fixes into a working prototype, delivered **2 weeks ahead of schedule**.

Education

National Institute of Technology Agartala

Agartala, India

B.Tech, Electrical Engineering

Dec 2021 – May 2026

Indian Institute of Technology (IIT) Mandi

Remote / Hybrid

Minor, Business Analytics – Product Analytics

Jan 2025 – Apr 2026

Leadership

MUNSOC NIT Agartala

Agartala, India

Founder & Lead, Student Organization

May 2023 – Nov 2024

- Founded the society and scaled it to **120+ active members** across 11 national events, writing SOPs still in use.

Skills

AI & Build: Claude, Claude Code, Cursor, LLM APIs (Gemini, Groq, Llama 3.3), React, TypeScript, Python (Pandas, Streamlit), Git

Ship & Measure: Vercel, Netlify, Streamlit Cloud, PostHog, SQL (PostgreSQL), Power BI, Plotly

Product & Ops: Customer Discovery, Scoping & Prioritization, Launch Readiness / UAT, Figma, Jira, Notion
